ABOUT

I am a computer science student in Poland with two years of practical web development experience. I specialize in JavaScript, React, Next.js, and TypeScript, with expertise in state management tools like Redux and Zustand. I am highly motivated, dedicated to solving complex challenges, and skilled at delivering scalable, high-quality solutions.

Experience

2 years

The main projects:

Voltex E-commerce Platform: Developed a responsive e-commerce application using Next.js and React, featuring a comprehensive product catalog with filtering options. Implemented dynamic product pages and an intuitive user interface to enhance the shopping experience. Deployed the application on Vercel for optimized performance and scalability.

URL: <https://next-voltex.vercel.app/>

SearchKino Movie Search Application: Developed a responsive web application using React that allows users to search for movies. The application fetches data from a movie database API and displays relevant information to the user.
