Profile

Experienced web developer with 2 years of expertise in building modern web applications using **JavaScript, React, Next.js, TypeScript, Redux, Zustand, PostgreSQL** and **Prisma**. Passionate about creating scalable, high-performance solutions and continuously improving user experience.

Work experience

Trainee frontend developer

Sept 2024 - jan 2025

Brands manago

As an intern, I was responsible for developing landing pages, optimizing web pages for performance, and implementing responsive designs. I worked closely with the team to improve user experience, ensuring fast load times and mobile-friendly layouts.

Portfolio Projects

 **Next Voltex**

[Live](#) | Fullstack E-commerce App

Tech: Next.js, TypeScript, Prisma ORM, PostgreSQL, NextAuth, Zustand

Summary:

Built a fully functional e-commerce store with server-side rendering, protected authentication using NextAuth, and dynamic product pages. Implemented cart logic, filtering, and sorting. Used Prisma for database access and Zustand for global state management.

 **SearchKino**

[Live](#) | React Movie Search App

Tech: React, TypeScript, JavaScript, REST API (TMDB)

Summary:

Developed a responsive SPA for searching movies via the TMDB API. Integrated asynchronous API calls, displayed movie data (titles, ratings, posters), and implemented clean UI with filtering. Focused on reusable components and effective state handling.

 **Swift Chat**

[Live](#) | Real-time Chat App

Tech: Next.js, TypeScript, Prisma ORM, PostgreSQL, Socket.IO, NextAuth, Zustand

Summary:

Created a fullstack real-time chat app with Socket.IO. Implemented authentication, online presence, live message exchange, and database persistence using Prisma/PostgreSQL. Managed global state and handled WebSocket events for instant updates.
